**Volume 115, No. 1, January (I) 1999**

R. García López and A. Némethi: On the monodromy at infinity of a polynomial map, II 1–20
Vladimir Mazorchuk: Verma modules over generalized Witt algebras 21–35
Ivan Kausz: A discriminant and an upper bound for $\omega^2$ for hyperelliptic arithmetic surfaces 37–69
M. Kapranov: Rozansky–Witten invariants via Atiyah classes 71–113
Maxim Kontsevich: Rozansky–Witten invariants via formal geometry 115–127

**Volume 115, No. 2, January (II) 1999**

Taro Fujisawa: Limits of Hodge structures in several variables 129–183
Mutsumi Saito, Bernd Sturmfels and Nobuki Takayama: Hypergeometric polynomials and integer programming 185–204
S. Khoroshkin, D. Lebedev, S. Pakuliak, A. Stolin and V. Tolstoy: Classical limit of the scaled elliptic algebra $\mathcal{A}_{\hbar,\eta}(\widetilde{\mathfrak{sl}}_2)$ 205–230
J. M. Landsberg: On a conjecture of Kontsevich and variants of Castelnuovo's lemma 231–239

**Volume 115, No. 3, February 1999**

Masami Ohta: Ordinary $p$-adic étale cohomology groups attached to towers of elliptic modular curves 241–301
Bin Wang: Mazur's incidence structure for projective varieties (I) 303–327
Louise Nyssen: Représentations extraordinaires 329–357
